Rich: Craig is still out sick so I will respond. HQs, and specifically the Administrator's Office, has been holding this package for several months. We have heard nothing as to when they will move forward with proposing approval through rulemaking. Absent any adverse comments during this rulemaking, NDIC would effectively be granted Class VI primacy. Until then, any Class VI permit applicants in ND would have to work directly with EPA as the permitting authority.

Subject: URGENT deadline CCS question

Hi, Enesta, Richard,
Hope you're both well. I have a 5 p.m. deadline for this. There is language on EPA's website that says EPA directly implements the SDWA UIC permitting Class VI Program nationally, except for the State of North Dakota. I know that North Dakota applied for primacy in 2013, but as of right now I did not think that had yet been approved.

Can you explain? Who would have primacy to issue class VI permits right now if someone were to apply for a permit in North Dakota?

<http://water.epa.gov/type/groundwater/uic/primacy.cfm>

Many thanks,

Bridget
